

Here's your Doctor Discussion Guide.

Use it to start a conversation with your doctor about whether you're at risk for hepatitis C (hep C).

Questions to ask your doctor:

- Could I be at risk for hep C?
- What tests do I need? What do test results show?
- What does viral genotype mean?
- Are there any foods or activities that I should avoid?
- Can hep C be cured?
- How long does treatment take?
- How much do treatments cost? Are there co-pay programs available?
- Should I see a specialist?

Symptoms I'm experiencing (check all that apply):

- | | | |
|--|---|---|
| <input type="checkbox"/> Fever | <input type="checkbox"/> Vomiting | <input type="checkbox"/> Joint pain |
| <input type="checkbox"/> Fatigue (feeling tired) | <input type="checkbox"/> Abdominal pain (pain in the gut) | <input type="checkbox"/> Jaundice (yellow coloring of the eyes or skin) |
| <input type="checkbox"/> Loss of appetite | <input type="checkbox"/> Dark urine | <input type="checkbox"/> Depression |
| <input type="checkbox"/> Nausea (upset stomach) | <input type="checkbox"/> Clay-colored stools | |
