

You're all set!

Here's your Doctor Discussion Guide. Use it to start a conversation with your doctor about whether you're at risk for hep C.

Questions to ask your doctor:

- Could I be at risk?
- What tests do I need/What do test results show?
- What does viral genotype mean?
- Are there any foods or activities that I should avoid?
- Can hep C be cured?
- How long does treatment take?
- How much do treatments cost? Are there co-pay programs available?
- Should I see a specialist?

Symptoms I'm experiencing (check all that apply):

- Fever
- Fatigue (feeling tired)
- Loss of appetite
- Nausea (upset stomach)
- Vomiting
- Abdominal pain (pain in the gut)
- Dark urine
- Clay-colored stools
- Joint pain
- Jaundice (yellow coloring of the eyes or skin)
- Depression
